

ABSTRACT OF THE DISCLOSURE

A coated bathroom or kitchen component product includes a transparent polymerized resin and inserts of gravel of marble and/or other stones embedded substantially uniformly in the transparent polymerized resin. The inserts have a coplanar leveled surface at a surface of the component. The inserts are surrounded by a surface of the polymerized resin defining surface depressions having a lowest depression surface in a region between inserts and the surface of the polymerized resin rising from the lowest depression surface to the level of the surface of the component adjacent to the inserts.
